EDUCATION

Equipment of chemical production and building material plants
Donetsk National Technical University
2011 - 2015

Technical Support Fundamentals (Google)
Coursera
2023

Cloud engineer
Dosvit
2024

HARD_SKILLS

- Amazon Web Services (AWS)
- Kubernetes
- Terraform
- Docker
- Packer
- GitLab
- Linux
- Git

SOFT_SKILLS

- Perform difficult and interesting tasks
- Work in a team over global calls
- Prefer a system thinking
- Have a balanced nature

LANGUAGES

- Ukrainian (native)
- English (intermediate)

WORK EXPERIENCE

Lean Specialist — 2019 - 2022

DTEK | Ukraine

Performed tasks on process optimization in coal beneficiation production. Utilized 5S and Lean principles to address industrial challenges. Implemented the 5S system and executed its integration into production processes.

System Administrator — 2022-2023

Freelance | Ukraine

Performed activation and maintenance of cloud servers for projects. Worked with cloud services such as Contabo, Linode, Vultr. Administered servers running Linux and Windows. Also performed deployment and monitoring of Docker services and images.

PART-TIME PROJECTS

Startup projects support — 2022-2023

The task involved organizing a network of cloud servers for startup projects. Deployment was carried out using cloud services for VPS hosting. Server performance monitoring was conducted through services such as New Relic and CoPilot. Password management for access was organized. Server management was performed through SSH connections.

Microservice apps deployment — 2024

The project entails deploying a microservices application on AWS servers using Terraform, GitLab, and Kubernetes. It was completed as part of the Dosvit educational course.
